

## 2016 PROSPECTIVE PRODUCT CONTENT LABEL <sup>1</sup>

Smart Choice matches 100% of your electricity usage. In 2016, Smart Choice will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New <sup>2</sup> Renewables in Smart Choice 2016		Generation Location
Wind	100%	OR
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison includes: Biomass & waste (1%), Geothermal (9%), Solar (4%), Wind (10%), Hydroelectric (3%), Natural Gas (27%), Nuclear (6%), and unspecified sources of power (40%). This resource mix was prepared in accordance with California State Law. Source: Southern California Edison Power Content Label 2014.

The average home in California uses 562 kWh per month. Source: U.S. EIA, 2014.
